Recommended Retest Method

1. Wait at least two days before reviewing the exact missed items.
2. Teach the underlying skill using new examples rather than memorizing answer letters.
3. Create a 10- to 15-question mini-quiz for the two weakest skills.
4. Require at least 80% on each mini-quiz before repeating a full timed section.
5. Use the full test again only as a pacing check, not as the sole measure of learning.
